

## Are you struggling to meet the cost of desexing your pet?

The National Desexing Network may be able to help.

NDN has a network of veterinarians across Australia who offer discount desexing to pet owners in genuine financial need. To find out if you qualify or if we can help visit our website at [www.ndn.org.au](http://www.ndn.org.au) or phone us on **1300 368 992**.

### DESEXING - THE FACTS.

PETS CAN BE DESEXED FROM EIGHT WEEKS OLD. EARLY AGE DESEXING GREATLY REDUCES THE CHANCE OF 'ACCIDENTAL' LITTERS.

PETS DO NOT NEED TO HAVE A LITTER BEFORE DESEXING, IN FACT DESEXING YOUR PETS BEFORE THEY BREED GREATLY REDUCES THE RISK OF MAMMARY CANCER AND UTERINE INFECTIONS WHICH CAN PROVE FATAL.

DESEXED ANIMALS ARE LESS LIKELY TO ROAM OR FIGHT AND ARE LESS LIKELY TO GET LOST, IMPOUNDED OR INJURED. THEY ARE ALSO LESS LIKELY TO DISPLAY TERRITORIAL BEHAVIOUR SUCH AS SPRAYING INDOORS.

PETS DON'T HAVE ANY CONCEPT OF SEXUAL IDENTITY. IF YOU ARE WORRIED ABOUT YOUR MALE PET'S APPEARANCE THERE ARE ALTERNATIVES SUCH AS TESTICULAR IMPLANTS (NEUTICLES) OR THE CONTRACEPTIVE IMPLANT SUPRELORIN. UNDESEXED MALES CAN IMPREGNATE HUNDREDS OF FEMALES EACH YEAR RESULTING IN HUNDREDS MORE UNWANTED LITTERS.

BY DESEXING YOUR PETS YOU ARE DIRECTLY RESPONSIBLE FOR SAVING THE LIVES OF THE ORPHAN CATS AND DOGS ALREADY WAITING FOR HOMES IN YOUR LOCAL POUNDS AND SHELTERS.

Every hour of every day around 23 healthy cats and dogs are killed in pounds and shelters across Australia simply because they have no homes.

Please help Australia **get to zero** euthanasia of healthy cats and dogs by desexing your pets *before* they breed.
