

The facts about animal overpopulation in Australia.

Cats and dogs have the unique ability to reproduce several times a year. They can go into heat as early as 5 months of age – sometimes earlier, and they can have litters several times a year! That is why there are so many homeless animals.

You can help us end the pet overpopulation crisis by:

Desexing your pet!

By working with the **National Desexing Network**, together we can make a difference. Simply contact us and you will be mailed a referral slip/certificate to redeem the low desexing rate at a veterinarian in your area who is a participant in our network.

Ask your vet to participate in the National Desexing Network

The more veterinarians that become part of the Network, the more pets we can desex, and the more lives we can save!

You can spread the word!

Educate others about the advantages of desexing their pet(s). Download and copy the flyers from our website and pass them on to others!

Sponsor a Spay!

You can make a donation and help those who can't afford the reduced prices.

Female Cat	\$70	Female Dog	\$110
Male Cat	\$55	Male Dog	\$85

If you would like to help by making a donation, simply remove the form on the right, fill it out and mail it to us. We appreciate your help and support in making a difference to help save lives.
